Cell Reproduction: True & False Homework

Answer all questions. Use your book and notes to help you. Be specific. Be scientific.

FIX THE FALSE ONES TO MAKE THEM CORRECT!

1. True or False. Mitosis makes sex cells.
2. True or False. Mitosis makes 4 body cells.
3. True or False. Sex cells have 100% of the DNA needed for an organism to survive.
4. True or False. In Mitosis, the cell splits more times than in Meiosis.
5. True or False. Meiosis makes 4 body cells.
6. True or False. Meiosis is used to repair damage and grow.
7. True or False. Regeneration is a type of sexual reproduction.
- 7½. True or False. Gamete is the moment when the sperm and egg cells join together.
8. True or False. Asexual reproduction requires sex cells.
9. True or False. Gamete is another name for body cells.
10. True or False. When budding occurs, a new, unique organism is formed.
11. True or False. Very complex organisms normally do asexual reproduction.
12. True or False. When an organism grows out of a piece of the original it is fission.
13. True or False. During Mitosis, right before the cells splits, it has 50% of the normal DNA.
14. True or False. When bacteria use sexual reproduction, they use fission.
15. True or False. Mitosis starts out with the same steps as Meiosis, but then has more.
16. True or False. Fertilization is the first cell of a new organism.
