

MR. KRALL - SCIENCE 8 GUIDE

(Feel free to hang this up at your house for when questions arise.)

Basics:

0. We are here to learn.

1. Always be on time. Always bring materials (i.e. writing utensil, binder, completed assignments).

2. *"Treat other people the way you would want to be treated."* is the guideline for behavior.

3. www.krallworld.net is our class website. **Please use it** to find notes, quizzes, assignments, etc.

4. Parents and students **please use SKYWARD** to check on student progress.

<https://www.sayresd.org/parents/skyward/> - Parents can set up an account through the school.

Types of Assignments & Grading:

Participation: 1-2 points. Assignments simply checked to see if they are completed. If it appears that the student made an honest effort, the student receives full credit.

Homework: 1-2 points. Typically started in class and finished outside of class. Based on notes. Can be redone any number of times for up to a 50%.

Quizzes: 1-3 points. **Computer** assignments. Based on notes. Can be redone any number of times until the due date. The highest grade earned of all attempts is the grade earned.

- By going to Quia.com and logging in, you can **always** check the grades on quizzes, and they **can be** worked on outside of school!

Tests: 10-15 points. These are pencil and paper exams taken in the classroom. Students should study, and be prepared to write. They can be redone **once** for up to an 80%.

Projects: *<points vary>* Activities which are collected and graded. Most often they **cannot** be redone. If they can be, it's for up to an 80%.

Overall grade = total points earned ÷ total points
